

MATT MARGOLIN

Tech Lead DevOps / Platform Engineering

✉ matt.margolin@gmail.com ☎ +1 (818) 970-1461 📍 Los Angeles, CA 🏠 reliable.consulting 🌐 @mm0 🌐 Matt Margolin

Staff-level Tech Lead with 15+ years building CI/CD platforms and cloud infrastructure. Expert at enabling organizational scale through platform strategy, architectural decision-making, and delegation. Applying deep expertise in reliability, cost control, and team enablement to architect the safe adoption of AI-enhanced and agentic development workflows.

📊 SKILLS

Cloud & Infrastructure: AWS, Terraform, CloudFormation, Kubernetes, Docker, Helm, ArgoCD, GitOps, ECS, EC2, S3, IAM, VPC, Systems Manager, Route 53, CloudFront, Akamai

CI/CD & Automation: Jenkins, CloudBees, GitHub Actions, Spinnaker, env0, Release Management, Deployment Strategy, Groovy, Bash, Python, Ansible, Shell Scripting

Observability: Splunk, CloudWatch, DataDog, Grafana, OpsGenie, SLOs/SLIs, Incident Response

Languages & Tools: Python, Go, Groovy, CueLang, Git, Linux, Helm, Make, YAML, JSON

Practices: Infrastructure as Code, Platform Engineering, Incident Management, Disaster Recovery, BCP, Mentorship, Technical Leadership, Container Security, Policy as Code, Sentinel, SOC 2 Compliance

AI & Agentic Systems: LLM Infrastructure, OpenHands, Agentic Workflows, Token Cost Optimization, RAG Patterns, Vector Databases, AI Observability

⚙️ EMPLOYMENT HISTORY

- 📍 **ALLSTATE PROTECTION PLANS - REMOTE** 2022 - Present 📅

TECH LEAD, DEVOPS ENGINEERING

 - + Lead a team of 12 DevOps engineers providing CI/CD, infrastructure, and platform services to 500+ software engineers.
 - + Drive platform strategy, initiative planning, and architecture consortium decisions across the engineering organization.
 - + Lead disaster recovery planning and business continuity efforts; establish cross-functional partnerships with IT, DBAs, and engineering leadership.
- 📍 **ALLSTATE PROTECTION PLANS - REMOTE** 2019 - 2022 📅

SENIOR DEVOPS ENGINEER

 - + Architected and drove adoption of GitOps workflows, Infrastructure as Code standards, and configuration management across the organization.
 - + Re-architected the release process and git branching strategy, designing and implementing the CloudBees Jenkins CI platform and shared pipeline libraries in Groovy.
 - + Served as escalation point for complex software, platform, and release engineering issues organization-wide.
- 📍 **VARIOUS - REMOTE** 2017 - 2019 📅

DEVOPS CONSULTANT

 - + Delivered DevOps solutions for Technogent, Farmers Insurance, LawTechSupport, Heartbeat, and CloudOptimizer.io.
 - + Designed CI/CD pipelines and configuration management for RedHat, IBM, and Oracle enterprise environments using Terraform, Ansible, and Jenkins.
 - + Architected serverless and containerized solutions using AWS Lambda, API Gateway, Node.js, Docker, and Kubernetes.
- 📍 **TRADESY (ACQUIRED) - SANTA MONICA, CA** 2014 - 2017 📅

LEAD DEVOPS ENGINEER

 - + Built and led the DevOps function from the ground up, growing the team to 4 engineers supporting 50+ developers.
 - + Built CI/CD pipelines and cloud infrastructure as code from scratch; established monitoring and incident response with OpsGenie, Splunk, and CloudWatch; scaled infrastructure to support rapid company growth.
 - + Engineered dynamic AWS QA, CI, and Staging environments for rapid development and integration.
 - + Drove scalability with Auto Scaling and performance testing; led initial transition to microservices architecture and Kubernetes.
 - + Orchestrated complete infrastructure migration from managed physical servers to AWS.
 - + Implemented High Availability production practices utilizing DNS, ELB, HAProxy, Percona, Elasticsearch, Redis, and RabbitMQ; achieved 100% uptime through systematic monitoring and incident response.
 - + Utilized Akamai DNS/CDN services and ModSecurity for security configuration and analysis.
 - + Automated developer environment configuration using Vagrant, VirtualBox, Ruby, Bash, and Ansible.
- 📍 **VINPORT MARKETING - NEW YORK, NY** 2013 - 2014 📅

FULL STACK DEVELOPER, CONSULTANT

 - + Transitioned from Prolific Interactive to independently maintain and extend Magento e-commerce platform.
 - + Developed custom Magento plugins and managed AWS infrastructure and databases.
- 📍 **PROLIFIC INTERACTIVE - BROOKLYN, NY** 2012 - 2013 📅

BACKEND DEVELOPER

- + Led backend development and server administration, helping the company grow into a leading interactive digital agency.
- + Architected software and developed using various technologies such as PHP, Node.js, and Objective-C/iOS.
- + Led Backend development by developing APIs for projects: Babeebook (iOS App), Fox MyTowns (iOS App), and Boothify (internal iOS/iPad App and custom automation for business).
- + Worked on Boothify internal management iOS App.
- + Created internal CRUD API framework designed for reusability.
- + Administered MySQL and Mongo Databases.
- + Developed custom Magento Site and Plugins for use by Vinport Marketing.
- + Managed and configured servers on AWS and created custom CLI tool for automation.
- + Used Git for source-code management and collaboration.
- + Used Pivotal Tracker for use with agile methodology and project management.
- + Provided system administration for various projects and to support a team of 10 engineers.

📍 WONDERMODE.COM - NEW YORK, NY

2011 - 2012 📅

LEAD DEVELOPER, CONSULTANT

- + Inherited project with agreement from Axis Services.
- + Developed front end user interface and backend (LAMP) for high-end e-commerce fashion startup wonderMode.com launched in spring 2011.
- + Administered and maintained LAMP servers in AWS and Rackspace.
- + Worked on creating custom PHP and jQuery modules for e-Commerce shopping cart, content management.
- + Maintained and developed shopping cart and content management backend and frontend.
- + Participated in daily standups.
- + Developed the online marketplace to be manageable by non-technical staff.
- + Worked on features such as order and payment processing, shipping automation, tooling and integration with various APIs.
- + Developed front end user interface and backend for fashion e-commerce marketplace startup launched in spring 2011. Administered LAMP in AWS and developed admin dashboard for managing orders, global shipments and payments.

📍 AXIS INTERNATIONAL - NEW YORK, NY

2010 - 2011 📅

DEVELOPER, ASSISTANT PROJECT MANAGER

- + Developed various modules and plugins using jQuery and PHP for various projects and assisted in the front-end HTML/CSS coding.
- + Helped manage local and outsourced team of developers and distributed tasks using the Agile Methodology.
- + Provided continuous support and development for the improvement of various projects.
- + Learned LAMP stack development.

📍 US DEPARTMENT OF COMMERCE - NEW YORK, NY

2010 📅

TECHNOLOGY AUTOMATION CLERK

- + Provided maintenance and system administration for hundreds of computers and peripheral equipment in an administrative office environment.
- + Executed duties including computer repair, remedy ticket management.
- + Administered user accounts, various devices and software.

📍 NYU LIBERAL STUDIES - NEW YORK, NY

2008 - 2010 📅

INSTRUCTIONAL TECHNOLOGY COORDINATOR

- + Worked as assistant to the Director of Instructional Technology.
- + Administered Blackboard, Educational Content Management System for common resources, used by the department.
- + Developed and implemented online resource management of learning resources and media through web design, blog management and various technology/web projects.

🎓 EDUCATION

📅 2006 - 2010

📍 NEW YORK UNIVERSITY

BA IN COMPUTER SCIENCE & ECONOMICS
