 Matt Margolin

SKILLS

Cloud & Infrastructure: AWS, Terraform, CloudFormation, Kubernetes, Docker, Helm, ArgoCD, GitOps, ECS, EC2, S3, IAM, Route 53, CloudFront

CI/CD & Automation: Jenkins, CloudBees, GitHub Actions, Spinnaker, env0, Release Management, Deployment Strategy, Groovy, Bash, Python, Ansible, Shell Scripting

Observability: Splunk, CloudWatch, DataDog, Grafana, OpsGenie, SLOs/SLIs, Incident Response

Languages & Tools: Python, Go, Groovy, CueLang, Git, Linux, YAML, JSON

Practices: Infrastructure as Code, Platform Engineering, Incident Management, Disaster Recovery, Mentorship, Technical Leadership, Security, Policy as Code

AI & Agentic Systems: LLM Infrastructure, OpenHands, Agentic Workflows, Token Cost Optimization, RAG Patterns, Vector Databases, AI Observability

Staff-level Tech Lead with 15+ years building CI/CD platforms and cloud infrastructure. Expert at enabling organizational scale through platform strategy, architectural decision-making, and delegation. Applying deep expertise in reliability, cost control, and team enablement to architect the safe adoption of AI-enhanced and agentic development workflows.

EMPLOYMENT HISTORY

- 

ALLSTATE PROTECTION PLANS - REMOTE

2022 - Present

TECH LEAD, DEVOPS ENGINEERING

- + Lead globally distributed team of 12 engineers supporting 500+ developers; standardize metadata-driven and GitOps practices.
 - + Drive platform strategy and architectural decisions; align infrastructure with business priorities.
 - + Architected disaster recovery and failover automation; coordinated practices for organizational continuity.
 - + Led migration from on-premises RHEV to AWS EKS, modernizing infrastructure and enabling cloud-native deployment patterns at scale.
 - + Drove post-acquisition integration of SquareTrade CI/CD platform into Allstate engineering organization; rewrote shared pipeline libraries to align with Allstate infrastructure while standardizing practices across both orgs.
 - + Led migration from GitHub Enterprise on-premises to GitHub SaaS; implemented configuration as code for GitHub organization and repository management.
 - + Designed custom GitFlow with automated enforcement; established standards for pipeline code, IaC, and automation.
 - + Supported monolith to microservices migration; established infrastructure patterns for safe team adoption.
 - + Evaluating agentic AI infrastructure patterns including LLM cost controls, token observability, and safe deployment standards for engineering organization adoption.
- 

ALLSTATE PROTECTION PLANS - REMOTE

2019 - 2022

SENIOR DEVOPS ENGINEER

- + Architected and drove adoption of GitOps workflows and Infrastructure as Code standards across the organization.
 - + Designed and implemented CloudBees CI platform and automation code; established release process, branching standards, and cloud-native practices; integrated artifact repositories and security scanning to prepare for infrastructure migration.
 - + Optimized Liquibase database schema automation to improve reliability and consistency of database deployments across environments.
 - + Provided technical leadership on complex software, platform, and release engineering issues organization-wide; mentored teams and drove resolution of critical infrastructure blockers.
- 

VARIOUS - REMOTE

2017 - 2019

DEVOPS CONSULTANT

- + Designed CI/CD pipelines and configuration management for RedHat, IBM, and Oracle enterprise environments using Terraform, Ansible, and Jenkins.
 - + Architected serverless and containerized solutions leveraging AWS managed services and Kubernetes.
- 

TRADESYS (ACQUIRED) - SANTA MONICA, CA

2014 - 2017

LEAD DEVOPS ENGINEER

- + Built and led the DevOps function from the ground up, growing the team to 4 engineers supporting 50+ developers.
 - + Built CI/CD pipelines and infrastructure as code; established monitoring and incident response; engineered dynamic environments; drove scalability and led microservices transition with Kubernetes.
- 

PROLIFIC INTERACTIVE - BROOKLYN, NY

2012 - 2014

BACKEND DEVELOPER
- 

WONDERMODE - NEW YORK, NY

2010 - 2012

LEAD DEVELOPER

EDUCATION

 2006 - 2010

 NEW YORK UNIVERSITY

BA IN COMPUTER SCIENCE & ECONOMICS
